

Technical Bulletin

Transition to Metric Brackets

Product: Bracket Kits

Date: Jan 6, 2014

We are pleased to announce that more Newall bracket kits are transitioning to 100% metric parts.

Background – Why a new version?

Some of our kits have always been 100% metric. Examples are the Spherosyn Center Support (600-84605) and Microsyn Single End Mount (600-65340). Most of our kits contain a mixture of metric and imperial parts. Transitioning the rest of our kits to 100% metric will simplify the installation process.

What kits are changing?

<u>Description</u>	<u>Current Part #</u>	<u>New Part #</u>
Spherosyn Scale Bracket Kit	FX0000BR	600-66810
SHG / DSG Scale Bracket Kit	FX00SDBR	600-80120
Spherosyn Heavy Duty Bracket Kit	FX00HDBR	EP-2722
SHG / DSG Heavy Duty Bracket Kit	FX0DHDBR	EP-2722-D
Spherosyn / SHG / DSG Single End Mount	294-23010	600-63610
Microsyn Scale Bracket Kit	FX000MBR	600-65320
MHG / DMG Scale Bracket Kit	FX00MDBR	MHBKITSTD

Reader head bracket kits will be transitioned to metric at a later date.

When will the changes occur?

After Feb 1st the new kits will gradually be rolled out. The metric kits will have a brightly colored sticker stating “Kit Components Now 100% Metric”.

How will this affect installations?

Installers should examine the kits received before starting the installation. The documentation inside the kit provides specific details about the parts inside.

Will part numbers for encoder assemblies or complete DRO systems change?

No.

Website Update

Documentation will be updated on the website as changes occur. Customers requiring additional information can contact our Technical Support Department.
